For Example:

Total 100 tags

Tag Mask: ABCD012345678901234567XX

Notes: 100 = 64Hex. Therefore, it needs two digits to store 100 tags.

Result:

ABCD012345678901234567**00**

…

ABCD012345678901234567**63**

For Example:

Total 10000 tags

Tag Mask: ABCD0123456789012345XXXX

Notes: 10000 = 2710Hex. Therefore, it needs four digits to store 10000 tags.

Result:

ABCD0123456789012345**0000**

…

ABCD0123456789012345**270F**
